I want to order (choose one):

Y-DNA12 (\$59) Y-DNA25 (\$89) Y-DNA37 (\$119) Y-DNA67 (\$208)

Check enclosed or Visa Mastercard American Express

Credit Card number _____ Expiration ____/____

Name on the card _____ Billing ZIP code _____

Signature: _____

BENEFITS OF TESTING WITH FAMILY TREE DNA

Other than the cost of the test, all the following services are provided FOR FREE

- You will be part of your Surname or Geographic Project
- You will be included in the largest Y-DNA database in the world
- You have total control over whether you compare your results only within your project or against the entire database
- The names and email addresses of your genetic matches are provided so that you may contact them
- Personal phone and e-mail support by qualified personnel. Both the phones and email messages are answered by a human being and not by an automated response system
- Family Tree DNA is the only service which has a calculator, created by our population geneticist, that gives you the likelihood of sharing a common ancestor with your genetic match within a certain time frame
- Family Tree DNA allows you to join, leave, and be part of multiple Projects at the same time, without any additional testing or cost
- As additional people test, your result will be matched against them and in case of a match you will be notified by e-mail
- Family Tree DNA allows you continued access to your account, projects, and matches without additional testing, cost or subscription fees
- Family Tree DNA is the only company that stores your DNA for 25 years allowing you to order additional tests using the original sample
- Family Tree DNA is the only company to offer the SNP Assurance Program: if no backbone haplogroup can be estimated with 100% certainty, FTDNA will SNP test your sample **for free**
- Family Tree DNA is the only DNA testing service that partners with National Geographic's Genographic Project and allows you to add your results to that project for a nominal fee that goes to the Genographic Legacy Fund.
